## Response to Amendment

Applicant's amendment received on August 5<sup>th</sup> 2004 in which claims 10-13 were added has been fully considered and entered, but the arguments are not persuasive.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-5, 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim (US Patent no. 5838829) for the same reasons as previously set forth in the last office action mailed on May 5<sup>th</sup> 2004, paper no. 6.

## Response to Arguments

Regarding claims 1-5, 7-11, the applicant argues that Kim does not teach or suggest "at least for and edge block of a segment, a motion vector is allowed to extend into adjacent segment". The examiner respectfully disagrees. A block consists of 8x8 square pixels. The claim calls for "an edge block of a segment, a motion vector is allowed to extend into adjacent segment". The applicant agrees that Kim discloses that "extended contour pixels may be constituted by the current contour pixels and the pixels adjacent to the current contour pixels along the x, y directions and two diagonal

Application/Control Number: 09/865,733

Art Unit: 2613

directions." To the examiner, a contour is an edge, a neighboring block is an adjacent block, therefore, the edge pixels are the contour pixels (i.e., block of 8x8 pixels at the edge/contour of the segment). These pixels in Kim are not limited to a specific number. Therefore, an 8x8 pixel block at the edge/contour is clearly taught by Kim, and thus, the "edge block of the segment" claimed by the applicant is anticipated by the prior art. The applicant is also reminded that in col. 4, lines 35-40, Kim teaches "contour extension". Further, in col. 3, lines 9-67 and in col. 4, lines 1-10, Kim gives details about the extension into the adjacent segment.

Regarding newly submitted claims 12-13, since Kim operates with low-bit and approximately the same error rate (See Kim col. 1, lines 20-33, and col. 4, lines 35-55), the ITU H.263+ is considered within the scope of Kim.

- 3. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Application/Control Number: 09/865,733

Art Unit: 2613

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gims S Philippe whose telephone number is (703) 305-1107. The examiner can normally be reached on M-F (9:30-7:00) Second Monday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris S Kelley can be reached on (703) 305-4780. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
